DETAILED ACTION

The submission of amendment filed on 11/28/03 is acknowledged. At this point claim 1 has been amended and is at issue in the instant application.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gerlat (US 3,233,093).

Gerlat shows in Fig.2 a semi-transparent plastic hood [30] having an opening formed for receiving a light bulb [29] therein. The opening has an inner surface portion adapted for contiguous contact with a corresponding portion of the light bulb [29]. The plastic hood [30] must inherently be soft and removable to fit over the light bulb [29]. Further, the plastic hood [30] must have some heat conductible property or else the light bulb [29] would overheat.

Gerlat discloses the claimed invention except for opening having extending therefrom a substantially cylindrical inner surface portion adapted for contiguous contact with a corresponding portion of the light bulb. It would have been obvious to one having ordinary skill in the art, at the time the invention was made, to provide the cylindrically-shaped opening, since it has been held that a mere change in shape of an element is

Art Unit: 2875

generally recognized as being within the level of ordinary skill in art when the change in shape is not significant to the function of the combination. Further, one would have been motivated to select the shape of the opening for the purpose of contiguous contact with a corresponding shape of the light bulb.

In re Dailey, 357 F.2d 669, 149 OSPQ 47 (CCPA 1966).

Response to Arguments

Applicant's arguments filed 11/28/03 have been fully considered but they are not persuasive.

Applicant argues, that opening of Gerlat's plastic hood is not a substantially cylindrical inner surface portion.

In response, it has been held that a mere change in shape of an element is generally recognized as being within the level of ordinary skill in art when the change in shape is not significant to the function of the combination. Further, one would have been motivated to select the shape of the opening for the purpose of contiguous contact with a corresponding portion of the light bulb. In re Dailey, 357 F.2d 669, 149 OSPQ 47 (CCPA 1966).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2875

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
